Amendment to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (currently amended) A kit, comprising:
- a fluorescently labeled phosphorylated compound which is capable of being phosphorylated to produce a fluorescently labeled phosphorylated product; and
- a polymer having multivalent metal cations associated therewith, wherein the multivalent metal cations bind the polymer to the phosphorylated product.
- 2. (original) The kit of claim 1, wherein the multivalent metal cations comprise trivalent metal cations.
- 3. (original) The kit of claim 1, wherein the multivalent metal cations are selected from a group consisting of Fe³⁺, Ca²⁺, Ni²⁺ and Zn²⁺.
- 4. (original) The kit of claim 1, wherein the phosphorylatable compound is selected from a group consisting of a serine, threonine or tyrosine substrate.
- 5. (original) The kit of claim 1, wherein the multivalent metal cations are chelated to the polymer.
- 6. (original) The kit of claim 1, wherein the polymer is between 5 kD and 1000 kD.
 - 7. (original) The kit of claim 1, further comprising a kinase enzyme.
 - 8. (original) The kit of claim 1, further comprising ATP.
 - 9. (original) The kit of claim 1, further comprising a buffer solution.

- 10. (original) The kit of claim 1, wherein the multivalent metal cations comprise Fe³⁺.
 - 11. (original) The kit of claim 1, further comprising a multiwell plate.
 - 12. (currently amended) A kit, comprising:
- a fluorescently labeled phosphorylatable compound which is capable of being phosphorylated to produce a fluorescently labeled phosphorylated product; and
- a binding component molecule having multivalent metal cations associated therewith, wherein the metal cations bind the molecule to the phosphorylated product.
- 13. (original) The kit of claim 12, wherein the multivalent metal cations comprise trivalent metal cations.
- 14. (original) The kit of claim 12, wherein the multivalent metal cations are selected from a group consisting of Fe³⁺, Ca²⁺, Ni²⁺ and Zn²⁺.
- 15. (original) The kit of claim 12, wherein the phosphorylatable compound is selected from a group consisting of a serine, threonine or tyrosine substrate.
- 16. (currently amended) The kit of claim 12, wherein the binding eomponentmolecule comprises a polymer.
- 17. (original) The kit of claim 16, wherein the multivalent metal cations are chelated to the polymer.
- 18. (currently amended) The kit of claim 1<u>7</u>2, wherein the polymer is between 5 kD and 1000 kD.
 - 19. (original) The kit of claim 12, further comprising a kinase enzyme.
 - 20. (original) The kit of claim 12, further comprising ATP.
 - 21. (original) The kit of claim 12, further comprising a buffer solution.
 - 22. (original) The kit of claim 12, further comprising a multiwell plate.
